“I always tell my students: If you have the experience, go for the certification. More and more organizations are looking for higher certifications.”

Réjean Pesant, CBCP, ITIL v3

CONSULTING

The majority of the time, clients call me because they have nothing and are starting from scratch, need me to help implementing a Business Impact Analysis, developing Plans, planning for an exercise or simply require my experience for coaching. New contracts are always a challenge, but following the Professional Practices, you know you are doing the right thing. It takes skill to adapt the framework to fit the culture of the organization.

ADVANCEMENT

I've been working in business continuity for over 20 years. I started by doing disaster recovery and was promoted to Global Disaster Recovery Coordinator. This experience enabled me to move into risk assessment, Business Impact Analysis and so on. As a consultant, my clients see the CBCP and know that I have the experience and can do the job.

ACCOMPLISHMENTS

I am most proud of my work in Business Impact Analysis. Every client is different – you have to understand the culture of the organization and what is best for them. The quality of the information you collect creates the good foundation, along with the template that I bring with me. For plan development, I use a workshop approach, bringing in my experience as needed.

Take your career to the next level.

If you've had your ABCP for a while and you've been working in Business Continuity, getting your CBCP is going to be easier than you think. You've gained experience and have the references to back that up. You've achieved a level of advancement you can show to the world with the CBCP credential. If you're ready to get started, we'll do all we can to get you there. Please check the website for supports that help successfully complete your application.
