

DRI CANADA Announces Brian P. Miller as Recipient of the Lifetime Achievement Award

Toronto, ON, June 23, 2015 – The Disaster Recovery Institute CANADA (DRIC) is pleased to announce Brian P. Miller as the recipient of the Lifetime Achievement Award, presented at the World Conference on Disaster Management on Wednesday June 10, 2015.

Brian is the President of Vanguard EMC Inc., a thriving consultancy providing government and private sector clients with best practice guidance for all aspects of business continuity and emergency management. He has more than 30 years of hands on experience and leadership in telecommunications, emergency management and business continuity. His Certified Business Continuity Professional (CBCP) designation was achieved in 1993 and his Certified Business Continuity Lead Auditor in 2010.

Brian joined DRIC in 1993 and upon becoming a member, he volunteered to head the organization and was elected President. Through his leadership, DRIC became recognized as a viable training and certification institution.

In addition to currently teaching business continuity for Disaster Recovery Institute International (DRII), DRI CANADA and the Canada School of Public Service, Brian is a former instructor at the Algonquin College of Applied Arts & Sciences and Development Dimensions International. He has taught the disciplines of emergency management and business continuity to over 3000 individuals since 1996.

The Awards of Excellence program was initiated in 2007. The Lifetime Achievement award is granted to a person who has demonstrated exceptional achievement within the Business Continuity and Technology Recovery (DR) industry. Such achievement must be demonstrated by the professional excellence over the course of a significant career.

To be eligible, candidates must be a DRIC member in good standing with a minimum CBCP or CFCP designation and be active in the BC/DR industry for a minimum of 20 years.

The Disaster Recovery Institute CANADA provides internationally recognized training and education services, certification and standards for Canada's business continuity planning/disaster recovery profession.
